

Highly Reliable, Business Broadband Guaranteed Uptime

Pacnet DSL INTERNET

SMEs today are increasingly demanding reliable communications networks to ensure access to productivity-enhancing business applications. Key to staying competitive in today's business environment is the deployment of a reliable always-on and fast Internet connection.

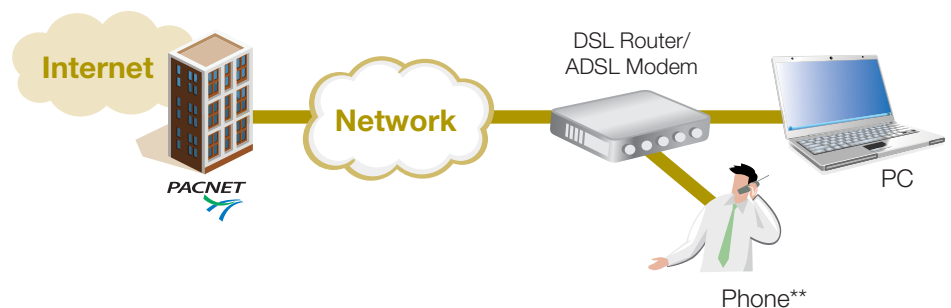

With Pacnet's DSL solution, SMEs will have the best broadband deal in Thailand with its highly reliable and faster Internet connection at a price that suits their budget. With both ADSL and G.SHDSL available, Pacnet DSL allows you to reliably support critical and standard business applications including email as well as web hosting while enjoying faster access to business data and rich multimedia content.

Pacnet DSL offers you:

- Simultaneous support for Internet and voice service
- Capability to support multiple client computers
- Cost effective package for SMEs
- Round-the-clock post sales services and technical service centers nationwide
- Support for standard email usage and web hosting
- Available in more than 70 provinces across Thailand

Technical Requirements

- Telephone lines from TOT or True Corporation for Business DSL service*
- DSL Router

* Other local loop provider may be arranged on an individual case basis. Please contact your Pacnet representative for more information.

** Only ADSL requires a phone line.
